Hi Dave,

I did a quick search of the electronic database that we got from CH2M and found some of the files. Sending 1 of 2.

Taurus

Jack, Taurus,

EPA has tasked its contractor CH2M with reviewing information on sources of sulfur used by Anaconda and by Arimetco. CH2M reviewed the document archives at the SPS facilities back in October and couldn't locate some of the files they need. EPA would appreciate your assistance in tracking down the files, or if electronic scanned versions are available, that would be good, too. Please see the list of information we need below. If you could report back to me and copy CH2M on your reply that would be great. Thanks.
